Senior consultant in Intellectual Property

Background

Entire AI is a newly founded company building an Artificial Intelligence (AI) platform to gather information and distribute research in crucial science areas of pharmaceuticals, energy, and engineering. Our platform can capture and make sense of vast open literature sources and allow SMEs and big companies to build value in their information assets. Entire AI is based in the Liverpool region and building its team over the next 12 months, with a product launch early next year. The founders of Entire AI have many years of scaling valuable companies with investments, offering enormous potential for Entire AI's exciting journey ahead.

Services Requested.

We are looking for an Intellectual Property (IP) consultant to support our Artificial Intelligence and Machine Learning software engineers in building products for intellectual property management. It is mainly to improve various business outcomes and drive innovation. You will join a multidisciplinary team helping to shape our AI strategy in Intellectual property and showcasing the potential for AI through early-stage platform solutions. It is an excellent opportunity for Entire AI to take advantage of emerging trends and technologies to a real-world difference. The services are part-time and rely on working with Entire AI's founders. The services required are;

- A supplier in managing and advising on processes to meet the needs of our AI strategy in capturing and protecting Intellectual Property.
- A supplier in understanding the company's aims and integrating AI capabilities in analysing patent portfolios.
- Demonstrable ability to support reviewing and valuing IP assets processes.
- Able to support identification and commercialising ideas through IP protection.
- Must have worked in a science setting in a similar capacity and be able to converse across disciplines.
- Advise on a broad range of technology, strategy, and policy issues relating to IP.
- Able to work with others to show processes involving Intellectual Property management.
- Demonstrable ability in Intellectual Property management.
- A supplier with knowledge of science sectors such as pharmaceuticals and energy is ideal.
- Demonstrable ability with program leadership, governance, and change enablement.
- Supplied services in an organisation individually and teams of highly skilled consultants and engineers in a complex technical project-based environment.
